It’s Time to Rethink Education

For decades, the U.S. has operated under the premise that universal college completion is an achievable national goal—with the high school diploma representing a ticket to college rather than a signifier of career readiness.

The problem is: for too many students, the traditional track simply doesn’t work.

For Every 100 High School Students in the U.S.¹

- 83 graduate high school
- 17 do not graduate
- 14 do not earn a degree within 4 years of enrollment
- 10 are under-employed
- 20 enroll in 2-year college
- 38 enroll in 4-year college or university
- 25 do not enroll
- 7 earn a degree
- 14 do not earn a degree
- 24 graduate

And even when students do everything “right,” many still struggle to find college-jobs²

- 14 earn college-job
- 10 are under-employed

86 students are left behind

Real World Learning Opportunities Help Students Excel

There are many paths to career success, but also many places to get knocked down along the way. Our communities need the talent and contributions of everyone.

Career-Based Learning
45% of students say career-based learning helps them with academic courses. Jobs can also count toward course credit.

Employer-Recognized Skill Sets
Increase opportunities to earn employer-recognized skill sets through internships and entrepreneurial projects.

Industry-Recognized Credentials
Industry-recognized credentials earned in high school enable students to work with purpose in college.

Apprenticeships
Apprenticeships allow students to gain valuable work experience and access to professional mentors and networks but there aren’t enough apprenticeship programs in the U.S. today.

It Takes a Community
From the heart of the country, the Ewing Marion Kauffman Foundation is committed to joining the national movement to rethink high school education. By providing funding, building connections with experts and advisors, supporting local organizations that create Real World Learning opportunities, and tracking data on student outcomes after high school, the Kauffman Foundation will strengthen the KC community to support students as they navigate from high school to career.

Every single student deserves an education that equips them for success beyond the classroom.
